

A majority of the 1st World is presently witnessing a catastrophic state of institutional failure in their primary state-sponsored Medical industries. Hospitals are being built at breakneck speeds to combat a global health crisis, but in reality, it's not actually a crisis at all, but in fact a masterfully orchestrated plan carried out by a sick Cabal of elite profiteers. Previously known as "Robber Barons," their wealth goes all the way back to Pharaoh. Over centuries, they've studied psychology, black magic and alchemy, and used their advanced occult knowledge against the common people. In a way the Healing Web is comparing the worst of Big Pharma to the best of Holistic medicine. That may seem biased at first, but as you come to understand the full history, and that Medicine is partially being employed as a tool for mass extermination, Holistic philosophy is clearly the better choice of first resort. Diet modification alone could prevent or reverse a majority of diseases, but our institutions have misled us on some of the most fundamental aspects of health & nutrition. They have lied about what is unhealthy, while at the same time, they've taken naturally healthy foods and sapped the nutrition out of them through cooking & pasteurization. Other foods have been transformed into poison by adding preservatives, and sugar. Many personal physicians may mean well, but the core of the Medical industry is frightfully corrupt. The interaction between Government, Big Pharma, Big Ag, and Big Food constitutes a perpetual genocide we've come to accept as the norm.

Thankfully, we still have a choice. Every condition would benefit from a multifaceted approach to treatment, such as a combination of detox, diet, exercise, immune support through supplementation, and energetic & spiritual healing. A holistic approach can even include a pharmacological treatment, with ancillary natural remedies to minimize the side effects.

What is the optimal diet for human health and longevity? Many are struggling to find an answer to this question. The debate has been heavily polluted with propaganda and misinformation from every angle. Clearly the Standard American Diet that most people grew up with was the wrong answer. Excess sugar and fried food have fueled one of the greatest unacknowledged epidemics man has ever known. Ninety percent of the regular grocery store is now the "poison" section. How can we navigate our way through this toxic labyrinth?

Before one heals, one must be willing to give up the things that are making him sick. Many are now rejecting the corporate food industry and the government endorsed "Food Pyramid." People are experimenting with different diets to find out what works best for them. One must choose the appropriate diet for their individual needs, at the appropriate time in their life. It would behoove us to not be married to a singular idea that might not serve us indefinitely. One must listen to their body, and adapt to situations as they arise. With advanced training, the body can be reprogrammed to require less food, but this should be considered a skill to master, not a treatment for disease in a time of need. Be wary of lab-made "Frankenfoods" being promoted by notoriously unhealthy mega-corporations under the pretense of being more health conscious. These may be part of the New World Order's depopulation agenda.

We are living through a war against our personal health being led by the establishment. To survive, we must go back to what we know is real, natural, and tested by time; organic, sustainable farming, and raw or minimally processed food. We've developed a culinary culture that mandates overcooking everything, destroying beneficial enzymes, bacterial cultures, and proteins. This causes poor digestion and malabsorption of nutrients, which can have a negative domino effect leading to greater systemic illnesses. It's time to unlearn everything we've been taught by the agencies we thought we could trust.

The healing technologies being withheld from the public could extend life close to immortality. The prospect of eternal life may sound alluring, but does humanity have the maturity yet to adhere to a more ethical population regulation strategy that doesn't rely on mass deception? Are we as a species nothing more than a swarm of locust, pillaging one continent to the next, consuming planet after planet, leaving barren radioactive ruins in our path? Would we be considered a plague by the rest of the galaxy? Natural law dictates "Kill or be killed," but how should civilization fit into the picture? All energy and life-force is recycled from something that came before it. We are all one, and simultaneously individual refractions of Source. The Universe embodies the Eastern wisdom of Yin and Yang, not the New Age mantra, "Love & Light." Our mission, beyond survival, is to learn how to coexist in harmony with each other and all other sentient life in the universe, to create, and make progress without requiring endless consumption, the model of our present society.
